Adaptation Innovation Theory Definition The adaptation-innovation theory was developed by Kirton in 1976 to determine people's cognitive styles and to identify adaptors and innovators on a continuum scale. This problem-solving and creativity model aims to increase collaboration and reduce conflict within groups (Kirton, 1976; Stum, 2009).

The Diffusion of Innovations theory was the leading theory in agricultural extension post World War II until the 1970s. It is still used today in agricultural extension, particularly when extension is concerned with an adoption of a particular technology (i.e. technology transfer approach to extension). Rate of adoption is a key feature of the theory - Everett Rogers developed adopter categories to 'measure' innovativeness of farmers to produce a statistical model (normal distribution ...
