Criticality and reliability go hand-in-hand. Think about it: We're told to prioritize PMs for critical assets, to build a TPM plan that accommodates critical pieces of equipment, and to perform root cause analysis on machinery that we consider to be high priority based on criticality. But how do we actually decide what makes a piece of equipment "critical"?

The asset criticality ranking will reveal which assets have a high ranking due to poor reliability - they will be good targets for reliability improvement projects. It will reveal where assets have a high criticality due to lack of detectability - that is a good place to implement condition monitoring.

Criticality and Workforce Strategy. by Neil McCormick. This is the fourth post in my series on Workforce Strategy. In Workforce 101, and What's the Objective?, we looked at the importance of defining and focusing on the organizational objective. In the Output's Connected to the Outcome, we discussed how it is easy to fall into the trap of focusing on process and outputs and ignoring outcome.
