surgery. These may cause irritation to your eye, which could delay the cataract procedure. Get plenty of rest and wear your eye glasses instead. 5. Wear comfortable clothes and avoid cosmetics. We think you look great exactly as you are, so please don't dress up for surgery.

How to Prepare for Cataract Surgery: The 8-Step Guide ...

Cataract surgery is one of the oldest procedures still being performed today. Ancient Egyptians used a surgical technique known as "couching," in which a sharp needle was used to slide the cloudy lens out of the field of vision and into the vitreous cavity in the back of the eye. Later, the Romans used a method called "needling" to slice up the cataract into pieces small enough to be reabsorbed.

Cataract surgery: Types, what to expect, and recovery

Cataract surgery is an elective surgical procedure performed by an ophthalmologist (an eye specialist) in an outpatient surgical center or in hospital. During cataract surgery, a patient's cloudy lens is broken into pieces and removed. The surgeon then replaces the removed lens with an artificial one called an intraocular implant, or IOL.
