Before we go any further it is important to define the term

“cryptocurrency fundamental analysis”.

Cryptocurrency fundamental analysis is a forecasting method used to predict the price of a digital asset, typically in the mid to long-term.

How to trade cryptocurrency

Cryptocurrency is digital money. Because it's purely digital, there are no physical coins or bills tied to it.

Cryptocurrencies are not tied to valuable assets — they are not tied to anything of value in the real world, and this makes the value fluctuate erratically, which you've likely seen.
