DIY CNC Router Plans

This CNC Router comes as a kit for assembly and provides a cutting area of 17.7 x 15.3 x 3.3 in. (450 x 390 x 85 mm). The frame of BobsCNC is made from laser-cut wood, which makes it a little unstable while cutting hard materials. On the bright side, such a frame reduces the cost of a machine, making it one of the popular choices for low-budget workshops. The E3 CNC router can cut and engrave MDF, wood and some other materials.

Addendum to manual M-1797022 for CNC Routers

A CNC router is a machine where you feed a system with certain instructions and the CNC Router operates like a pre-programmed computer. In simpler terms, the CNC Router converts a design given in terms of number and coordinates and executes the instructions. The design is usually made using CAD. Since these CNC routers don't come cheap, many users buy a small version, usually a 4x8 CNC router to fit their needs.
