Easter and hybrid lily production : principles and ...

Easter lilies were ranked 4th in wholesale value (\$36.7 million in 1999) among potted flowering crops. An anticipated 8,906,000 pots were grown in the 2000-2001 season. The Easter lily is indigenous to the Japanese islands of Ryukyu, Okinawa, Oshima, Takeshima and Kawanabe, In its native environment the Easter lily grows in humus deposits on

Easter Lily Production

So how did this small strip of coastal land become such a dominant force in the production of Easter Lilies? It all began in 1919 when a man named Louis Houghton introduced some hybrid lily bulbs to

the south coast of Oregon and planted the seeds - so to speak - of what would become the Easter Lily Capital of the World.

The Easter Lily Capital of the World - Eastern Floral ...

The Easter lily (*Lilium longiflorum*) is a perennial bulb with large, white, trumpet-shaped flowers and wonderful fragrance. Often known as the trumpet lily among gardeners, this plant is called the Easter lily due to its role as a traditional Easter-time symbol. Roughly 95 percent of the 11.5 million Easter Lilies sold each year are grown by one of a handful of growers located along the border ...

How to Grow and Care For Easter Lilies (Trumpet Lilies)

The common Easter lily, the tiger lily, Asiatic and Oriental hybrid lilies all contain a toxin that can be fatal to cats, causing renal failure. All parts of the plants are poisonous to cats, but especially the flowers. This is particularly problematic with potted Easter lilies kept indoors where a house cat is present, but cats roaming ...

14 Recommended Lily Varieties for Your Garden

All species of lilies fall into one of nine hybrid divisions, including Asiatic, American, Oriental, and more. While these classifications are important for both true lily connoisseurs and budding growers alike, if we're being honest, we're here for the pretty. Read on for the 17 types of lilies we just can't get enough of.

17 Types of Lilies - Favorite Perennial Flowers

Scientific name: *Lilium longiflorum* and *Lilium* species Description: Single-stemmed bulbous plants. Lance-shaped, arching leaves grow in an alternate pattern from the thick, herbaceous stems. The trumpet-shaped flowers of the Easter lily are white; hybrid lilies are available in red, orange, and yellow.

Easter Lily and Hybrid Lilies | Ornamental Production

The longiflorum hybrids are produced primarily for the Easter holiday as a potted crop while the asiatics and orientals are marketed nearly year round as cut flowers and potted plants. In Florida, production of the asiatic and oriental hybrid lilies occurs generally from late fall through late spring.

Production of Hybrid Asiatic and Oriental Lilies

Current U. S. production of Easter lily bulbs for the florist market began with a World War I soldier, Louis Houghton, who brought bulbs to the south coast of Oregon in 1919.

This is how the Easter lily became the holiday's flower ...

While the popularity of lilies for cut-flower use continues to be very strong, popularity of potted lilies, based on production, has increased about 10 percent per year for the past several years. Part of the increased demand for potted lilies is because consumers view the plant as a dual-purpose purchase.

Why You Should Grow Lilies - Greenhouse Grower

The importance of the Easter lily is a time-honored tradition that includes both ancient mythological and Biblical history. White lilies have been associated as much with the Virgin Mary as they ...

Easter Lily Tradition and History - Guardian Liberty Voice

Around the turn of the century the Japanese took over the annual Easter lily growing and exportation to the United States, which continued until World War II. The current U.S. production began after a World War I soldier, Louis Houghton, brought a suitcase full of hybrid lily bulbs to the south coast of Oregon in 1919.

Easter Lily Facts and Care » The Christopher Farm & Gardens

Pot-cooled bulbs are normally potted & held for 3 weeks at 63F before starting 6 weeks of bulb cooling at 40-45F (see the 2017 Easter Lily schedule for details). The bulbs then require 14 weeks of greenhouse forcing. This entire process requires 23 weeks from initial potting to Easter. This same process is used for both naturally cooled or CTF bulbs.
