Online Japanese woodworking course - DIY Japanese Joinery

Japanese Wood Joinery “ Sashimono ” is a technique for assembling furniture and other wooden items without nails, using both simple and highly complex wood joints. Mortises or grooves called ‘hozo’ are carved into the wood in order to join two boards in a blind joint that’s not visible from the surface.

Sashimono - Japan Woodcraft Association

Get Started with Japanese Joinery. The kanawa tsugi, translated as a half-blind tenoned, dadoed, and rabbeted scarf joint, is used to splice two pieces of wood together end to end. It’s a strong, interesting joint that Andrew Hunter cuts by hand. The key to this joint is accurate layout, and the key to accurate layout is a story stick that contains all the dimensions you need.
