Law As Engineering Thinking About

Law as Engineering proposes a radically new way of thinking about law, as a profession and discipline concerned with design rather than with litigation, and having much in common with engineering in the way it produces devices useful for its clients. It uses that comparison to propose ways of improving legal design, to advocate a transformation of legal ethics so that the profession learns from its role in the crash of 2008, and to reform legal education and research.

What do lawyers do? : 01 Law as Engineering Thinking About ...

The logic you used in engineering will serve you well in law. But logic isn't enough; you have to write well and you have to speak well. Logic gets you a fair amount of the way there, writing gets you up to about 95%, and speaking covers the other 5%.

Thinking about a career change from engineering to law ...

Engineers, as trained in engineering school, are bound to think logically. This skill could be really handy in law school, since legal analysis, according to Tsu, follows a very logical progression i.e., start with A, add B, with exception C, put it through process D, apply rule E, and you will get the likely answer Z.

What Engineers Need to Know Before Going to Law School ...

A majority of people who end up becoming MPs and Ministers have a law background. If this is something you might aspire for in the future, law is the way to go. Engineering = usual choice these days, set pattern, good money. Law = good money, power, but a path less taken as compared to engineering. All the best.

If I have a choice between studying law or engineering ...

As a sixth form student choosing to do a law degree, I wish I'd have been better informed about what it's really like to be a law student. I was young, naive and full of false expectations. I ...

Ten things I wish I'd known before becoming a law student ...

Engineering (or any hard science) and law can be a powerful combination. The communications skills developed in law school can be a great complement to the quantitative skills developed in your engineering training. The framework for analyzing legal cases is also largely similar to scientific problem solving techniques.

Read PDF Law As Engineering Thinking About What Lawyers Do

Engineering's goal (problem solving) and its method (deduction and analogy) is much closer to medicine and ethics than to science. Its rhetoric (justifying its analogies) is close to law, and perhaps to economics. Table 1 summarizes three approaches to thinking, which groups engineering with these disciplines.

Engineering Thinking - Intuac

Law students develop the ability to argue from a basis of evidence in a way which can be hard for others to do; this actively cultivates advanced communication skills, keen problem-solving abilities and the capacity for independent thinking. As a result, law graduates adapt very well in various situations or career transitions.
