As Klein et al.(2006) wrote, 'Making sense of data is the process of fitting data into a frame and fitting a frame around the data'. Translated to education, this provides valuable insight into the problems of teachers having trouble in understanding and using student data. For, if teachers want to overcome the previously mentioned

Number sense plays that same role in math.

In the past, teachers have concentrated on math facts and how to do calculations. Now, after years of research, they have found that the reason students struggle with learning math is because they don't have the underlying foundation of what numbers actually mean: number
