MILK: A DEADLY POISON. According to the United States Department of Agriculture (USDA), in 1994 the average American ate 586 pounds of milk and dairy products, 394 pounds of vegetables, 121 pounds of fresh fruit, 199 pounds of meat and 193 pounds of products containing flour and cereal. That totals to over four pounds of food per day per person and nearly forty percent of that is milk and dairy, one very lopsided food pyramid!

Book review "MILK The Deadly Poison" by Robert Cohen

Robert Cohen performed research in the 1970's on the hormonal effects on the brain and behavior. Twenty-five years later, this father of three became concerned about the most controversial drug approval in FDA history, the genetically engineered hormone that is now in our milk supply. Along the way, Cohen discovered that milk is implicated in

Is Milk Healthy?

The cows' milk allergens simply appear in the mother's milk and are transmitted to the infant. A committee on nutrition of the American Academy of Pediatrics reported on the use of whole cows' milk in infancy (Pediatrics 1983: 72-253).

Milk: The Deadly Poison | ENCOGNITIVE.COM

Milk, is actually bleaching calcium from our bones, not putting calcium into it. Dr Young says milk contains lactose, which is a sugar in the body, and when sugar is released into the bloodstream, calcium is used by the body from our calcium reserves in our body (eg the bones), to neutralize the acids of the sugar.
