enjoying your cat! When it comes to dog wound care, Neosporin on dogs is an option, not a rule. Based on what we have learned about the ingredients of Neosporin on dogs, there are usually good outcomes when they are used on dogs.

Neosporin On Dogs - The Do's And Don'ts of Treating Your Pet

Dogs Can Benefit From Neosporin (though safer options exist) The saying “lick your wounds” comes from the propensity of canines to do just that. Yet it’s important to prevent your dog from licking once Bacitracin is on the affected area. For safe and effective healing, this topical antibiotic needs to stay put—not be ingested.

Is Neosporin Dog-Friendly? | Best Advice For Safe Use!

You can apply Neosporin as an added layer of protection, but only apply a small amount two to three times per day until the wound is fully healed. Again, dogs don’t heal like humans and applying too much Neosporin could disrupt the healing process. It’s important to be careful about this to avoid creating new problems.

Is Neosporin Safe for Dogs? - PetGuide

Neosporin and dogs are not always a great mix. The first reaction for most dogs after applying antibiotic ointment is to lick it off. If your dog ingested Neosporin, it is unlikely he will experience any harmful side effects, however it won’t be effective for wound management if it is immediately removed like this.

Is Neosporin Safe for Dogs? Uses / Dosage / Side Effects

...

Neosporin is fine to use on your dog for very minor cuts and scrapes — it can help prevent bacterial infections and can keep your dog from scratching, licking, or biting at the wound site while it heals. Make sure he or she doesn't lick off the ointment after you've applied it, and your pup should be fine.
