The Port Planning Process 1. ENVIRONMENTAL IMPACT ASSESSMENT Requirements definition Preliminary plans formulation Impact assessment Evaluation and trade-off Test against the do-nothing alternative Use of stepped impact matrices or impact trees (impact trees are networks with primary impact branching at the first node and secondary or dependent impacts at the next and subsequent node ...

The Port Planning Process - LinkedIn SlideShare

The planning and design of ports and marine terminals is a complex exercise, whether it is for green field ports or for expansions of existing ports. The growth in trade is reflected in an increase in cargo volumes transported (such as containers, liquefied bulk, and dry bulk) and requires an extension of port capacity in most ports worldwide.
