Predictive Modeling with SAS Enterprise Miner

SAS Enterprise Miner provides a number of tools for predictive modeling. Three of these tools are the Regression node, the Decision Tree node, and the Neural Network node. The methods used in these nodes come from several areas of research, including statistics, pattern recognition, and machine learning.

Combining Decision Trees with Regression in Predictive Modeling with SAS® Enterprise Miner™
Kattamuri S. Sarma Abstract The purpose of this paper is to illustrate how the Decision Tree node can be used to optimally bin the inputs for use in a logistic regression. Binning can be viewed as a complex non-linear transformation of the inputs.
