Macroeconomics Chapter 6 Flashcards | Quizlet

Macroeconomics (from the Greek prefix makro-meaning "large" + economics) means using interest rates, taxes and government spending to regulate an economy's growth and stability. It is a branch of economics dealing with the performance, structure, behavior, and decision-making of an economy as a whole. This includes regional, national, and global economies.

Money is any item or verifiable record that is generally accepted as payment for goods and services and repayment of debts, such as taxes, in a particular country or socio-economic context. The main functions of money are distinguished as: a medium of exchange, a unit of account, a store of value and sometimes, a standard of deferred payment. Any item or verifiable record that fulfils these ...
