Python per tutti - Dr. Chuck

Python allows for user input. That means we are able to ask the user for input. The method is a bit different in Python 3.6 than Python 2.7. Python 3.6 uses the input() method. Python 2.7 uses the raw_input() method. The following example asks for the username, and when you entered the username, it gets printed on the screen:

Python User Input - W3Schools

Potete fare molta strada solo con la libreria standard. Se state imparando a programmare in Python, è possibile (e perfino consigliabile) limitarsi alla libreria standard per molti mesi, prima di iniziare a esplorare altro.
