#### **David Bohm**

David Joseph Bohm FRS was an American scientist who has been described as one of the most significant theoretical physicists of the 20th century and who contributed unorthodox ideas to quantum theory, neuropsychology and the philosophy of mind. Bohm advanced the view that quantum physics meant that the old Cartesian model of

of science and of scientists, and this disposition was not well received. After writing a textbook on quantum theory that was released in 1951 that was praised by Albert Einstein among others, Bohm followed up in 1952 with a journal article titled A Suggested Interpretation of the Quantum Theory in Terms of "Hidden" Variables.

## Quantum Theory

### David Bohm

David Bohm took the view that quantum theory and relativity contradicted one another, and that this contradiction implied that there existed a more fundamental level in the physical universe. He claimed that both quantum theory and relativity pointed towards this deeper theory.
